FixedSaver 24 — 24-Month Fixed Rate Plan (Texas)

1. Plan Overview

FixedSaver 24 is a 24-month, fixed-rate residential electricity plan available in ERCOT service territories. The per-kWh energy charge is locked for the full 24-month term and does not change with wholesale market conditions.

2. Rate Structure

Usage Tier	Base Charge	Energy Charge (per kWh)
0 – 500 kWh	\$9.95 / cycle	\$0.132
501 – 1,000 kWh	\$9.95 / cycle	\$0.128
1,001 – 2,000 kWh	\$9.95 / cycle	\$0.135
2,001+ kWh	\$9.95 / cycle	\$0.142

3. Contract Term

24 months. Early termination fee of \$200 applies if the customer switches providers before the contract term ends, prorated down to \$0 at the 24-month mark on a straight-line basis (approximately \$8.33 reduction per completed month).

4. Winter Usage Credit

FixedSaver 24 includes a Winter Usage Credit: a \$25 bill credit applied automatically in any billing cycle falling within the December 1 – February 28 window where the customer's usage exceeds 1,000 kWh. The credit requires no enrollment or customer action and appears as a line item labeled "Winter Usage Credit" on the statement. This credit is unique to FixedSaver 24 among current residential plans — PLAN-VAR-TX and PLAN-FREENIGHTS-TX do not include it.

5. Billing and Discounts

FixedSaver 24 customers are eligible for the autopay/paperless discount described in BILL-AUTOPAY-DISCOUNT. Late payment terms follow BILL-LATEFEE-POLICY.
