

Prior Authorization Request

SYNTHETIC DEMO DOCUMENT - NOT FOR CLINICAL USE

Submitted via Provider Web Portal

Patient Name: Morgan Reed (synthetic demo patient)

Requesting Provider: Dr. Avery Chen - Example Spine Clinic

Ordering NPI: 1928374650

Diagnosis Code(s): M54.5 (Low back pain)

Procedure Code(s) Requested: 72148 (MRI lumbar spine without contrast)

Urgency: Routine

Clinical Notes

Patient reports 8 weeks of pain in the lower back with intermittent radiculopathy into the left leg. Symptoms interfere with sitting and work. The current examination documents stable gait and no progressive neurological deficit. No bowel or bladder changes, fever, recent trauma, or history of malignancy are reported. No implanted device or other MRI contraindication is documented.

The clinician requests MRI lumbar spine without contrast to further evaluate persistent symptoms. This submission includes only the current visit note.
